## Why Our Children Can't Read, And What We Can

### Do About It

By Diane McGuinness, Ph.D.

The Jamesons were a model middle-class family. Jim and Pat were devoted parents to their three children, umpiring for little league, running car pools to diving lessons, dancing lessons, and soccer practice. They valued learning and read bedtime stories every night.

Their youngest son, Donny, started kindergarten after two years at a well-run preschool. Donny could recite the alphabet, write most of his letters, his first and last names, and could count to 2,000 if anyone would let him. In kindergarten and first grade, Donny

taught himself to read several simple books. He got an A on his report card for Language Arts. His teacher said he was the "best reader in the class."

---

---

---

---

---

---

---

---

In second grade the words got longer. Donny had trouble remembering all of them. He began to ask his friend, "What does this word say?"

He would try to memorize it for the next time he saw it in a story. As the year went by, he had to ask his friend more and more often.

Second Grade  
211,000

Fifth Grade  
1,080,000

Tenth Grade  
2,300,000

Source: The 90% Reading Goal, Fielding, Kerr, Rosier, Pg. 4.

---

---

---

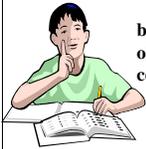

---

---

---

---

---

**In third grade the words got longer still. The books had more pages. He had to guess so many of the words when he was reading that he couldn't make sense of the story.**

Pat spent more time listening to Donny read and correcting his mistakes as they went along. Despite this extra tutoring, Donny's reading did not improve. And, by now she had discovered that Donny could memorize the week's spelling words only long enough to pass the test, but forgot them completely only days later.

Donny was now a year and a half behind in reading, two years behind in spelling, yet had an IQ of 124.

---

---

---

---

---

---

---

---

The parents found a tutor in the Yellow Pages. The cost was \$80.00 an hour; the person was kind and patient, but knew as much about how to remediate reading problems as Pat and Jim.

The tutor merely listened to Donny read and corrected his mistakes.

---

---

---

---

---

---

---

---

“The psychological, social, and economical consequences of reading failure are legion. If you do not learn to read and you live in America, you do not make it in life.”

--Dr. Reid Lyon, Chief, Child Development and Behavior Branch, NICHD

---

---

---

---

---

---

---

---

QUESTION:

What percentage of fourth graders cannot read at grade level?

---

---

---

---

---

---

---

---

“Students who fall behind in reading and writing **DO NOT** catch up unless or become fluent readers unless given intensive, systematic, and expert help.”

-Lyon, 1996; Torgeson, Wagner, Rashotte, Alexander and Conway, 1997.

“NICHD studies show that 90 – 95% of reading impaired children CAN overcome their difficulties if they receive appropriate treatment from an early age...”

---

---

---

---

---

---

---

What do you know about dyslexia?

---

---

---

---

---

---

---

**What is dyslexia?**

**What does dyslexia look like?**

---

---

---

---

---

---

---

What type of intervention should happen for those identified as dyslexic?

---

---

---

---

---

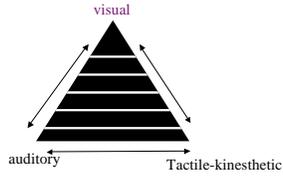

---

---

## 1. Make Learning Multisensory

What are the learning pathways?

### The Language Triangle

Using these three senses simultaneously facilitates students' abilities to learn and recall information.

---

---

---

---

---

---

---

---

## 2. Explicit, Systematic, and Cumulative

• Explicit instruction means what?

• The sequence must begin with the easiest and most basic elements and progress methodically to more difficult material. Each step is based on material already learned.

• Once a skill is taught, it is never dropped.

---

---

---

---

---

---

---

---

### Order of Introduction:

1. a, b, c (cat), f, h, l, j, k, m, p, t, i
2. g (goat), o, r, l, n, u, x, e, s, d, w, qu, y, v, z
3. Digraphs: ch, wh, sh, th

- |         |          |
|---------|----------|
| 1. fib  | 6. foz   |
| 2. bog  | 7. fath  |
| 3. pat  | 8. sep   |
| 4. shut | 9. poth  |
| 5. wish |          |
|         | 10. code |
|         | 11. vome |

4. Silent E Syllables:

---

---

---

---

---

---

---

---

**3. Diagnostic and Prescriptive**

**Individualized teaching  
is based on  
careful and continuous  
assessment  
of the individual's needs**

---

---

---

---

---

---

---

---

4.

## Cognitive

Based on logic and reasoning

At school, spelling is taught as a memorization skill. The dyslexic student must learn it as a thinking skill.

"Words with /U/ and /oo/"

- |          |            |            |  |
|----------|------------|------------|--|
| 1. bloom | 7. used    | 13. movie  | 19. tune   |
| 2. ruler | 8. loose   | 14. human  | 20. beautiful  |
| 3. broom | 9. whose   | 15. avenue | 21. through  |
| 4. usual | 10. glue   | 16. dew    |  |
| 5. roof  | 11. clue   | 17. flute  | Cook, Farnum, Gabrielson, & Temple, 1998,<br>Page 28. As found in Birsch text, page 227. |
| 6. few   | 12. rescue | 18. due    |  |

---

---

---

---

---

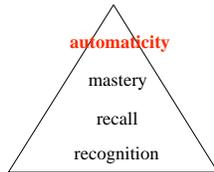

---

---

---

## 5. Taught to Automaticity

Four levels of learning:

It must be recognized that the learner needs to internalize each concept learned as the basis for further learning.

---

---

---

---

---

---

---

---

## 6. Emotionally Sound

"Confidence in one's ability cannot be developed if trying brings about failure too often."

- Success orientation
- Isolated reading and spelling

Students are never asked to read or spell anything that has not been directly taught and practiced.

- Confidence
- Fluency
